REPORT SUMMARY

A. Facility Description

McKenzie County Correctional Facility (MCCF) is a grade one (1) correctional facility under N.D.C.C. S.S. 12-44.1-06; the jail is located at 1201 12th Street South East, Suite C, Watford City, North Dakota. McKenzie County Correctional Facility is operated under the authority of the Jail Administrator, Travis Olson. Jail Administrator Travis Olson and the McKenzie County Correctional facility are under the McKenzie County Joint Powers Board's governing authority. MCCF houses male and female inmates up to one (1) year or until an inmate's court cases are completed.

The correctional facility is part of the McKenzie County Law Enforcement Center, encompassing a two-story building. The master control room is centrally located within the facility, with no direct line of sight into the housing units. The master control room does have a direct sight into the two (2) indoor recreation areas. There are secondary control stations located in each unit. During the inspection, these secondary control stations were utilized. The master control room can take over

these units if needed. MCCF physical plant consists of a master control room, administrative offices occupied by administrator, quality assurance director/PREA, chief of security, and the lieutenant. The facility has a program room in each housing area, large vehicle sally port, booking unit, observation cells, group holding cells, kitchen, laundry, attorney visiting rooms, interview rooms, dayrooms, property storage rooms, IVN rooms, janitor closets, restrooms, medical treatment areas, chemical storage closets, library, and two (2) inside recreation areas with louvers for outside air. Additional administrative offices are located throughout the facility.

Services provided include ministry programs, work release, work release ministry, inmate treatment release program, AA, healthy relationship program, mentorship services, job placement, prenatal counseling, and behavioral programming for tribal members. Due to COVID, a number of these programs were limited. The facility also provides the distribution of prescribed medicines, commissary meals, a full-service kitchen, laundry, and a library. All inmate eats their meals within the dayrooms of their unit. The law library is available on a laptop in two (2) locations at the facility. Offenders eat their meals within the dayrooms of their unit. Delivery of services is an effort to reduce the likelihood of confrontations between offenders, and the facility is designed to minimize offender movement. All offenders are housed based upon their needs and their respective level of classification.

MCCF is comprised of two (2) units; each unit is individually contained with smaller pods. MCCF housing units include maximum, medium, and minimum custody classifications. Additional classification levels are protective custody and special management units. Each pod has particular guidelines depending on the inmate classification. There are nine (9) pods located within these two (2) units. Unit A has four (4) housing pods. Two (2) of these pods are equipped with eight (8) single bunk cells, one (1) pod has eight (8) double-bunk cells, and the last pod with sixteen (16) double bunk cells. Unit B contains five (5) housing pods. Two (2) of these pods are equipped with eight (8) single bunk cells, one (1) pod with sixteen (16) single bunk cells, and the last two (2) pods with eight (8) double bunk cells. Each unit has pods surrounding a central control/officer station. Each of these serves as secondary control/officer stations and can view all pods. Each pod has large windows in the dayroom. These windows restrict visibility from the inside of the pod and give a direct officer observation of the pod and dayroom. The housing units are all similarly situated with upper and lower-tier cells. Stairs in the dayrooms access the upper tier cells. The lower level comprises of the dayroom, located in the front of the housing pod, and a private shower situated at the left or right rear side in the lower and upper tiers of each housing pod. The recreation areas have several large windows for officer observation. These windows give a direct view of the recreation areas from the secondary control stations.

The design of each shower unit allows the offenders to have adequate privacy for showering. Each cell has a washbasin and a toilet in the immediate sleeping areas. Offenders assigned to a pod do not have contact with offenders in another pod. Each cell is equipped with an intercom that allows offenders to communicate with staff. Each pod has basic furnishings, television, kiosks, phone, and multi-purpose areas. All housing pods have seating for the number of inmates, which makes use of each pod. All housing pods have access to natural lighting and illumination for comfortable reading in living areas. Dayrooms allow offenders to congregate, watch television, use the telephone system, and access the kiosk system. Kiosks are used for visitation and ordering of commissary.

The booking and intake area has eleven (11) individual holding/administrative segregation cells. Seven (7) cells with beds, three (3) cells with benches, as well as one (1) safety cell. A washbasin and a toilet are included in ten (10) individual holding/administrative segregation cells. The safety/observation cell has a flushing floor toilet, mounted flush with the floor, and the controls are

located outside of the cell. The safety/observation cells are used temporarily for inmates under the influence of alcohol or drugs, who display violent behavior, self-harm, or inability to exercise self-control. The safety/observation cells are located near the officer's duty station. The safety/observation cells are constructed to provide personal visual observation from the officer's duty station, but the officer does not have personal visual observation into all of the cells from the duty station. Each holding/administrative segregation cell has one (1) large window for officer observation. There are three (3) additional rooms, two (2) rooms contain a toilet, and one (1) room contains a shower. The booking officer does not have direct personal visual observation into all cells from the booking desk. All group housing units and cells within the booking area have cameras, intercoms, and duress lights. Monitoring is accomplished by electronic camera(s), which are continuously monitored in the master control room and the booking officer station.

McKenzie County Correctional Facility has an authorized staff consisting of Jail Administrator Travis Olson, twenty-eight (28) full-time security staff, two (2) administration staff, and one (1) medical staff. MCCF maintains staffing levels of one (1) employee to six (6) offenders. The average length of stay for inmates is thirty-three (33) days. One thousand thirty-six (1,036) male offenders and two hundred sixty (260) female offenders were processed for 2020. MCCF maintains verbal and contractual agreements to house inmates from different jurisdictions, including; U.S. Border Patrol, parole and probation DOCR, Counties of Adams, Williams, Cass, Divide, Southwest Multi-Correctional Facility, and the City of Arnegard, ND.

MCCF has ten (10) phones located throughout the facility for inmate use. The jail lobby is monitored twenty-four hours a day. MCCF has one hundred forty-one (141) cameras throughout the facility, all of which are operational. This inspector could not find where electronic surveillance was a substitute for periodic personal observations by facility employees. MCCF has a large vehicle sally port that can provide entry for up to ten (10) vehicles transporting inmates and emergency vehicles. A handheld wand is utilized for any person entering the front entrance or for cell searches. MCCF has one (1) walk-through metal detector at the entry of the facility. The front entrance provides an entrance and exit for the public.

McKenzie County Correctional Facility has established guidelines for COVID-19 that address housing, quarantine, and healthcare issues. MCCF guidelines are 1) implemented revised bond schedule to help reduce the rate of incarceration, (2) utilizing "cite and release" for people charged with misdemeanors, (3) protecting meaningful access to counsel and pretrial support, 4) providing appropriate care and hygiene to those who remain incarcerated, and 5) increased the level of sanitation requirements throughout the facility. MCCF's long-term goals are to protect the health and safety of incarcerated individuals, staff, visitors, and the community at large.

B. Sanitation

The correctional facility inspectors found the level of sanitation and cleanliness to be outstanding throughout the facility. The physical plant was well maintained, with no notable physical plant issues. The correctional facility inspectors found that the offenders were provided with the equipment and materials necessary to clean their assigned areas. The correctional facility inspectors found that waste and trashcans are emptied at least one (1) occurrence every day and as often as needed. For vermin or insects, MCCF has retained a professional exterminator. The correctional facility inspectors did not find any disagreeable odors in the facility, and the offenders had access to hot and cold running water. Noise levels and temperatures were within the normal levels throughout the facility.

C. Audit Scope and Methodology

Documentation reviewed for this inspection includes facility policies, procedures, forms,

educational materials, grievances, training curriculum, employee training records, inmate booking files, inmate property receipt, organizational chart, posters, PREA brochures, PREA audit, inmate handbook, operation manuals, litigation, notice of claims, and significant incidents. These materials were provided to demonstrate compliance with the North Dakota Correctional Facility Standards. The correctional facility inspectors did not examine budgetary records or official findings aside from what was provided. The inspection also consists of touring selected areas of the facility and having a discussion with various offenders, staff, and management. We used a limited judgmental sample for the facility inspector observations and relied on our professional judgment to conclude when we observed practices. The correctional facility inspectors had complete access to the facility.

Summary of Inspection Findings

Based on the inspection, interviews, and documentation review, the DOCR finds the McKenzie County Correctional Facility in compliance with North Dakota Correctional Facility Standards.
